

The game changer in pipe hole cutting

SNAP DRILL

www.snapdrill.no

Developed and manufactured
in Norway

SNAPDRILL is the only hand-held and automatic hole cutting solution for pipes

Fasten the clamp, pull the trigger and let Snapdrill do the work for you.

With our patented technology you'll save time, money and improve work safety from the first cut.

How? Self-centering clamp. Automatic feed. Carbide cutting teeth. Unparalleled stability. Incredible tool life and see to believe speed.

Say good-bye to broken pilot bits, wrists and off center outlets.
Say hello to Snapdrill.

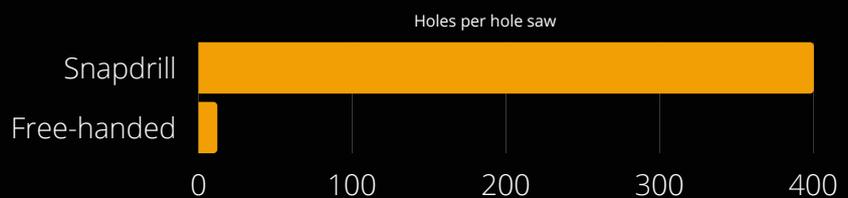

See to believe

Up to 6x faster

Using less than one minute from start to finish, Snapdrill cuts holes up to 6 times faster than with conventional methods.

Incredible tool longevity

Cut down on tool consumption. Our hole saws last at least 400 holes in carbon steel pipe, compared to less than 15 with conventional methods.

Catalogue

Our tools come nicely organized in compact and stackable tool boxes, with room for everything you need to start hole cutting smarter than ever before.

The different Snapdrill models cover most of the standard pipes in various trades, and cuts in galvanized, stainless and carbon steel pipe.

Model	DN	Inches	Hole Saw
SD42,4/48,3	DN32/40	1-1/4 + 1-1/2"	24, 30mm
